Appl. No. 10/780,935 Amdt. dated September 26, 2005 Reply to Office action of June 28, 2005

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

1. (Previously Presented) A rollable mulch carpet comprising consisting of:

a base material made from a non-biodegradable, generally flexible and porous <u>rubber</u> material, the base material having a lower ground engaging surface and an upper surface; and

an artificial mulch-like material having the general appearance of natural wood mulch, the artificial mulch-like material being made from shredded rubber tires substantially the same material as said base material and being bonded to the upper surface of the base material only along a lower portion of the artificial mulch-like material such that an upper portion of the artificial mulch-like material is exposed; said artificial mulch-like material substantially covering the upper surface of the base material; said mulch-like material being bonded to the upper surface of the base material by chemical or heat without the use of glue.

- 4. (Previously Presented) The process of Claim 20 wherein the step of adhering the mulch-like material to the base material comprises using an adhesive which is generally waterproof.
- 5. (Currently Amended) The rollable mulch carpet of Claim 1 wherein the mulch-like material and the base material are made substantially from the same rubber or plastic material.
  - 6. (Canceled)
  - 7. (Canceled)
- 8. (Currently Amended) The rollable mulch carpet of Claim 7 wherein Claim 1 wherein the rollable mulch carpet is flexible enough to be stored, transported, or installed in a rolled up configuration.
- 9. (Original) The rollable mulch carpet of Claim 8 wherein the mulch-like material is generally weather resistant.
- 10. (Original) The rollable mulch carpet of Claim 9 wherein the rollable mulch carpet is manufactured in generally rectangular sections of about 3 feet in width and about 10 feet in length.
- 11. (Original) The rollable mulch carpet of Claim 10 wherein the base material includes a plurality of openings of not greater than about 0.0625 square inches.
- 12. (Original) The rollable mulch carpet of Claim 11 wherein the base material and the mulch-like material are resistant to damage by insects.

Appl. No. 10/780,935

Amdt. dated September 26, 2005

Reply to Office action of June 28, 2005

13. (Original) The rollable mulch carpet of Claim 1 wherein the mulch-like

material is adhered to the base material in a single layer that substantially covers the

upper surface of the base material.

14. (Original) The rollable mulch carpet of claim 13 wherein the single

layer of mulch-like material has a thickness of about 0.5 inch or less.

15. (Currently Amended) A process of manufacturing a rollable mulch

carpet comprising consisting of the steps of:

providing a <u>rubber</u> base material that is generally flexible and substantially

porous and having an upper surface;

providing a mulch-like material from a weather resistant material made from that

is one of either shredded rubber tires or plastic and which is made of substantially the

same material as the base material having the appearance of natural wood mulch; and

bonding the mulch-like material to the upper surface of the base material only

along a lower portion of the mulch-like material such that an upper portion of the mulch-

like material is exposed; said mulch-like material being bonded to said base material in

a single layer and without the use of glue.

16. (Original) The process of Claim 15 further comprising the step of

manufacturing the rollable mulch carpet in generally rectangular sections.

- 17. (Original) The process of Claim 16 further comprising the step of manufacturing the rollable carpet mulch in a generally rectangular section having a width of about 3 feet and a length of about 10 feet.
- 18. (Previously Presented) The process of Claim 15 wherein the step of bonding the mulch-like material to the base material is performed either by the application of heat or by chemically boding the mulch material to the base material.
- 19. (Original) The process of Claim 15 wherein the rollable mulch carpet has a thickness of about 0.5 inch or less.
- 20. (Currently Amended) A process of manufacturing a rollable mulch carpet emprising consisting of the steps of:

providing a <u>rubber</u> base material that is generally flexible, substantially porous and has an upper surface;

applying a layer of adhesive over the base material upper surface; and

placing a layer of mulch-like material over the adhesive to adhere the mulch-like material to the base material such that an upper portion of the mulch-like material is exposed; the mulch-like material being made from a weather resistant material that is ene of either shredded rubber tires or plastic.
